

MAYUR UNIQUOTERS LIMITED

Manufacturer of Artificial Leather

Mayur Uniquoters Limited is the largest manufacturer of artificial leather, using the 'Release Paper Transfer Coating Technology' in India. Mayur has come a long way in the past two decades from a meager production of 0.25 million linear mtrs/month, to an astonishing 3.75 million linear mtrs/month, through its 6 coating lines. The latest addition is the PU plant at Morena with an initial capacity of 5 million mtrs/annum and a total expandable capacity 20 million mtrs/annum.

The guiding principle of the organization has always been fulfillment of customer requirement and progressive thinking. This is now the culture of the organization and ensures that both domestic and international customers are satisfied.

We have been certified with ISO 9001 :2000 (Quality Management System) since 2005 which is demonstrative of our commitment towards designing and manufacturing of artificial leather through effective implementation of quality systems and continual improvement in all our processes.

PLANT-1 Jaitpura

Non- Automotive Centric Plant

PLANT-2 Dhodsar

Automotive Centric Plant

- 1.90 Million LM / Month
- 4 Coating Machine
- 3 Printing Machine
- 1 Vacuum Embossing Mach
- 1 Each Foam Lamination, Sueding and Dry Tumbling
- 12 Inspection M/cs
- Laboratory
- Employees: 700+

PVC Division-

- 1.85 Million LM/Month
- 2 Coating Machine
- 4 Printing Machines
- 2 Embossing Machines
- 1 Perforation M/c
- 12 Inspection M/cs
- 4 Laboratory
- Employees: 400+

Textile Division-

- 1.72 Million LM / Month
- 37 Knitting M/cs
- 1 Each-Slitting, Dying and Stenter M/c
- 2 Gumming M/cs
- Employees : 100+

MAYUR MANUFACTURING UNITS

- Latest established PU plant at Morena(Madhya Pradesh)
- Initial capacity of 5 million linear mtrs/annum
- Expandable capacity of 20 million linear mtrs/annum
- Produces 100 % PU products
- Product applications are Automotive, Footwear, Leather Goods & Furnishing.
- Comply with REACH / Calprop 65 specifications

Vision

To be a value creator for Customers, Suppliers, Employees, Shareholders, Statutory & Regulatory Bodies and Society through continuous improvisation and innovation in all our processes.

Mission

Drive profitable growth by providing an excellent customer experience through consistency, high quality products and services, with great stakeholder relationships, in a sustainable manner.

Values

Values of Mayur have been woven around seven major aspects, which are evidently visible in all the activities performed by the company.

Customer

Service & Satisfaction is key

Quality

High Performance, High Assurance

Culture

Close Knit

Employee

Recruit, Train, Develop & Grow

Innovation

Think fast, Think New, Think ahead

Environment

Responsible actions for a sustainable future.

CSR Commitment

Holistic Approach

VISION & VALUES

Mayur has a clear policy of "**AVOID, REDUCE & REUSE**" that governs business practices with a strong emphasis on natural resource conservation. Incorporating new systems & technologies, we have always endeavored to be sensitive towards nature and its resources.

Rain Water Harvesting :

To arrest ground water decline and to augment water table, we have implemented a rain water harvesting system in all manufacturing units.

- ✓ Effluent Water Treatment in ETP- To treat process effluent.
- ✓ Water Recycling- by using ETP and RO plant
- ✓ No water Discharge (Dhodsar plant is ZLD - Zero Liquid Discharge Plant)

Fossil Fuel & Energy Conservation :

Mayur has taken the following measures to curb energy consumption.

- ✓ Hot air is recycled at the oven in the coating line to reduce energy consumption.
- ✓ Transparent sheets have been fixed in the roof-lines to increase incoming natural light.
- ✓ 100 % Compliance of legal requirements related to environment.

R&D Testing Lab

- R&D and Design lab capable of producing proto type product with right colour, Grain, Gloss, Touch & Feel.
- Testing equipment include Xenon, QUV, Environmental FOG, Seam fatigue, Seam Strength, Tensile, Abrasion etc.
- New analytical capability with FTIR & GCMS

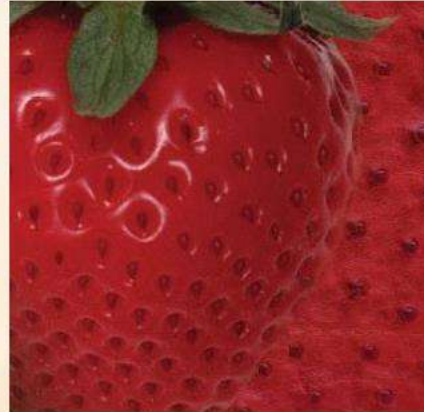

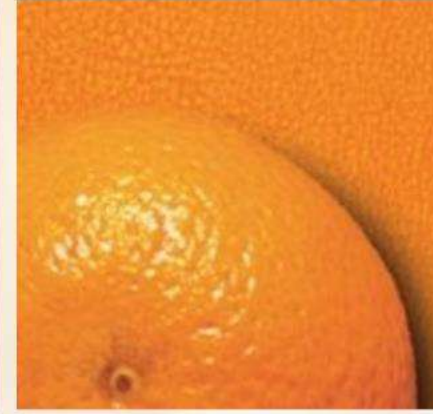

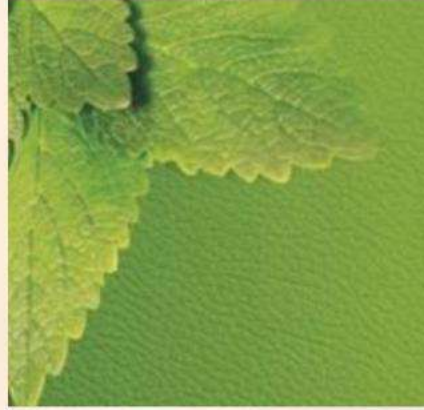

R&D Testing Lab

- R&D testing lab fully equipped to test 99% of the requirement, (except for Anti Squeak Test) to confirm performance, strength and durability.

RESEARCH & DEVELOPMENT CAPABILITIES

Our design team works round the clock to create new textures, patterns & colour trends interpreting customer requirement & offering an innovative and cost sensitive product suitable for various segment application.

Mayur has developed a range of leather textures & colours that are inspired from our day-to-day products, nature, fauna & flora.

Production Capacity Growth (in Million Linear Meters / Month)

CAPACITY GROWTH

DOMESTIC-FINANCIAL PERFORMANCE

- **Demonetization & Introduction of GST**
- **In sports shoe segment, Artificial leather is replaced by fabric**
- **Penetration of Chinese PU in footwear industries also resulted in sales drop**
- **Less Automotive Demand in Q1**
- **Covid-19 Impact in Q4**
